

Sustainability Practices

Efficient Operations, Mindful Packaging, and Waste Reduction

Our Approach to Sustainability

CARTA treats sustainability as operational discipline rather than marketing decoration.

We design for energy-efficient facilities, sensible water use, and smart waste handling across cultivation, manufacturing, and retail.

Operational Practices

Using efficient HVAC, lighting, and fertigation systems to reduce environmental impact while maintaining product quality.

Implementing thoughtful waste-separation and disposal processes for plant material, solvents, and packaging.

Packaging and Customer Role

We seek durable and recyclable materials where possible while maintaining safety and shelf life.

Customers can help by recycling packaging where accepted and returning batteries or hardware to proper drop-off locations.

Key Takeaway

Sustainability is a series of better choices over time—CARTA is committed to continuous improvement as technology and standards evolve.
