

# Sprays Guide

---

Universal Booster & THC Stacker—fast, flexible control.

## Introduction

CARTA sprays are pocket-sized tools that help you fine-tune your experience in seconds. Use them alone or layered with capsules for timing-specific needs.

## Science Explained Simply

- Rapid onset: Oral mucosal absorption can be faster than standard edibles.
- Titration: One spray at a time allows careful adjustments to find your sweet spot.

## CARTA Product Spotlight

- Universal Booster: Adds gentle lift and synergy to capsule baselines.
- THC Stacker: Provides an incremental THC boost when appropriate for the occasion.

## Practical Guidance

Try one spray, wait, then reassess before adding more. Use the app to record timing and context (workout, social, sleep prep) to learn where sprays fit best for you.

## FAQ & Myth vs Fact

Q: Can I stack sprays with inhalation?

A: Yes, but keep doses low at first. Add only one new variable at a time.

## Responsible Use & Safety Notes

Do not drive after THC sprays. Keep child-resistant caps engaged. Avoid use with sedatives or alcohol.

## Key Takeaway

Sprays give you the volume knob for your day. Small changes, big control.
